

# Accountant for Renewable Energy Solutions

*Are you a detail-oriented accountant with a good sense of humor, looking for an important role in an expanding company? We're seeking someone who enjoys working independently while being part of a larger team. If you're eager to contribute your financial expertise to a forward-thinking company in the renewable energy sector, we want to hear from you.*

*This is a great opportunity to make a meaningful impact in a dynamic industry. You'll play a vital part in our Swedish office while collaborating with colleagues across the globe to help achieve our sustainability goals.*

As our Accountant, you will manage a variety of accounting tasks, ensuring the smooth operation of financial processes. From daily accounting to payroll management, you'll support the business by providing key insights and maintaining accuracy. You'll work closely with the Swedish team in Piteå while staying connected with your global team and wider network. In this role, you will be part of a specialized and supportive global accounting team, reporting directly to the Accounting Manager, where collaboration, expertise, and a positive work environment are key to our success.

## **Responsibilities:**

- Manage daily bookkeeping and ensure accurate general ledger entries.
- Handle accounts payable, including invoice processing, payments, and vendor reconciliations.
- Oversee accounts receivable, manage customer invoicing, and follow up on payments.
- Lead month-end and year-end closing, including preparing financial statements and reconciling bank accounts.
- Prepare VAT reports and ensure compliance with Swedish tax regulations.
- Process payroll for all employees, ensuring timely and accurate salary payments.
- Manage expense reporting and employee reimbursements, including company credit cards.
- Handle accruals, provisions, and manage fixed assets and leasing.
- Act as the point of contact for financial queries from employees, customers, and vendors.
- Prepare audit documentation and support internal and external audits.
- Continuously improve accounting and payroll processes for greater efficiency.
- Provide management with financial insights and reporting to aid in decision-making.

## **You are:**

We're seeking an individual who is organized, adaptable, and able to work independently while building strong relationships. You

- Are structured and capable of handling multiple responsibilities.
- Have excellent interpersonal skills and enjoy collaborating with others.
- Work well independently but feel comfortable being part of a global team.
- Are committed to improving processes and finding efficiencies.
- Have experience in accounting, payroll (Visma HR), and financial reporting, preferably within Sweden.
- Be fluent in both Swedish and English.

## **What We Offer**

We offer an opportunity to become part of a company on a growth journey. You'll have the opportunity to manage key financial operations, and your contributions will support both local and global efforts. You will work with dedicated and committed colleagues in an inspiring environment that will encourage you to grow both personally and professionally.

You will be working mainly from our office in Piteå, Sweden with the flexibility to work from home occasionally. We provide pension and health insurance. You will be employed under the terms according to CBA – SEKO Energiavtalet.

## **Interested?**

Send your CV and motivational letter today via the "Apply"-button.

Please note that we do not accept applications via e-mail.

We process applications on an ongoing basis and will close the process once we have found the right candidate.

## **About Swire Renewable Energy**

Swire Renewable Energy (SRE) is a global service provider specialised in the installation, inspection, maintenance, and repair of renewable energy infrastructure, particularly focusing on wind and solar PV farms. Headquartered in Aarhus, Denmark, SRE has a strong international presence with regional offices strategically located in Australia, Denmark, South Africa, Sweden,

Taiwan, and the UK.

Our core services encompass comprehensive project management, engineering expertise, and efficient asset management solutions, catering to clients throughout the entire lifecycle of renewable energy assets, including construction, operational, and decommissioning phases. Our commitment to delivering tailored and innovative services ensures that customers optimise the efficiency and longevity of their renewable energy investments and maximise the production from their assets.

At the heart of Swire Renewable Energy is a dedicated team of over 500 highly skilled technicians, each possessing specialised knowledge in areas such as high voltage systems, mechanical engineering, blade maintenance, and construction. With a high focus on Health and Safety, these specialists are instrumental in providing bespoke solutions aimed at maximising the performance and sustainability of our customers' green energy assets.
