

Technicians for pre-assembly and installation Projects

Swire Renewable Energy is happy to announce new opportunities for Wind Turbine Technicians! We're looking for MW Technicians to join us on pre-assembly and installation Projects in EU. If you're looking for new opportunities and have experience as Mechanical Technician on Vestas turbines, then we will be happy to have you onboard!

Before you start the project, you must ensure to have these certificates in date:

- GWO (with Sea Survival)
- OGUK and Chester Step
- HUET with CAEBS
- Vestas certificates

Interested?

Let us know if you're interested by clicking the Apply button below, send through your CV and certificates and we will be in contact with you!

If you have the experience we need, our team will be in touch with you to discuss details.

Don't miss this amazing opportunity to become a part of a great team in SRE!

About Swire Renewable Energy

Swire Renewable Energy (SRE) is a global service provider specialised in the installation, inspection, maintenance, and repair of renewable energy infrastructure, particularly focusing on wind and solar PV farms. Headquartered in Aarhus, Denmark, SRE has a strong international presence with regional offices strategically located in Australia, Denmark, South Africa, Sweden, Taiwan, and the UK.

Our core services encompass comprehensive project management, engineering expertise, and efficient asset management solutions, catering to clients throughout the entire lifecycle of renewable energy assets, including construction, operational, and decommissioning phases. Our commitment to delivering tailored and innovative services ensures that customers optimise the efficiency and longevity of their renewable energy investments and maximise the production from their assets.

At the heart of Swire Renewable Energy is a dedicated team of over 500 highly skilled technicians, each possessing specialised knowledge in areas such as high voltage systems, mechanical engineering, blade maintenance, and construction. With a high focus on Health and Safety, these specialists are instrumental in providing bespoke solutions aimed at maximising the performance and sustainability of our customers' green energy assets.
