

# Wind Turbine Service Technician - Onshore & Offshore

Wind Turbine Service Technician - Onshore & Offshore

Swire Renewable Energy is looking for skilled experienced Wind Turbine Service Technicians to join us on upcoming projects in Denmark.

Requirements for these opportunities at SRE include:

- You have experience in service and maintenance on either SGRE, Vestas, GE or Nordex turbines
- You ideally have Vestas service level D+C qualification.
- You ideally have SGRE Level 4 / Level 5 authorization/nomination
- You have a completed a mechanical/technical/electrical education.
- You are cooperative, communicative, open-minded, and flexible – with respect for others and other cultures.
- Ability and confidence to work at height (includes physical fitness to climb)
- Clean drivers' licence and ability to obtain a Passport.
- Valid GWO training and OGUK Medical Fitness certificate
- Must be eligible to hold a valid Passport and Driver's License.
- Good communication skills in English both verbal and in-writing.
- Right to work in the EU.

Main responsibilities:

- Participate in maintenance and servicing wind turbine generators.
- Perform Commissioning and Troubleshooting tasks
- Major Component Exchange
- Corrective Maintenance
- Check and supervise that quality measures and safety instructions are being respected.
- Check and supervise the selection and usage of special tools and equipment.
- Snagging and preventative maintenance of components.
- Completion of documentation.
- Additional tasks as required by site management.

## About Swire Renewable Energy

Swire Renewable Energy (SRE) is a global service provider specialised in the installation, inspection, maintenance, and repair of renewable energy infrastructure, particularly focusing on wind and solar PV farms. Headquartered in Aarhus, Denmark, SRE has a strong international presence with regional offices strategically located in Australia, Denmark, South Africa, Sweden, Taiwan, and the UK.

Our core services encompass comprehensive project management, engineering expertise, and efficient asset management solutions, catering to clients throughout the entire lifecycle of renewable energy assets, including construction, operational, and decommissioning phases. Our commitment to delivering tailored and innovative services ensures that customers optimise the efficiency and longevity of their renewable energy investments and maximise the production from their assets.

At the heart of Swire Renewable Energy is a dedicated team of over 500 highly skilled technicians, each possessing specialised knowledge in areas such as high voltage systems, mechanical engineering, blade maintenance, and construction. With a high focus on Health and Safety, these specialists are instrumental in providing bespoke solutions aimed at maximising the performance and sustainability of our customers' green
