

Project Manager - High Voltage & Electrical

Deadline:
28-11-2025

Position type:
Full time

Swire is hiring again!

We're growing fast and looking for an experienced **High Voltage Project Manager** to join our HV & Electrical department.

This role is responsible for leading projects from start to finish — managing budgets, timelines, quality, safety, and team coordination — while ensuring customer expectations are met and delivered to the highest standard.

Key Responsibilities

Project Management

- Lead customer projects from proposal to completion.
- Develop and manage project plans (scope, budget, schedule, quality, risk, contracts).
- Track progress, address deviations, and ensure timely delivery.
- Complete all required project documentation (handover, checklists, HSEQ files).

Customer & Stakeholder Management

- Act as the main contact for clients and internal teams throughout the project.
- Lead project meetings (kick-off, handover, progress reviews).
- Align internal stakeholders on scope, deliverables, and resources.

Sales & Tender Support

- Support project planning, cost estimation, scheduling, and risk assessment for tenders.
- Provide input and documentation for proposals and scopes of work.
- Participate in business risk reviews and due diligence.

Qualifications

- Relevant degree (business, engineering, or equivalent technical/commercial background).
- Proven experience in project management, ideally in wind or a related technical industry.
- Proficiency with MS Project, ERP systems, and Excel.
- Fluent in English.

Key Competencies

- Strong problem-solving and critical-thinking skills.
- Excellent planning, organization, and multitasking abilities.
- Solid understanding of project and financial management principles.
- Clear and confident communicator, both internally and externally.
- Flexible, proactive, and adaptable to change.
- Skilled in stakeholder relationship management.

Offer

- A chance to join a **growing and dynamic organization**, where you can actively contribute to building and shaping the work environment.
- **Excellent conditions for professional development** – we support growth, initiative, and new ideas.
- A **friendly, open, and communicative company culture** based on trust and collaboration.
- **Supportive colleagues and leaders** who are always ready to help and share their expertise.
- **Competitive salary and working conditions**, aligned with your experience and contribution.
- Access to **modern tools and resources** that make your work effective and enjoyable.
- An opportunity to work for a company with a **strong reputation and great standing** in our industry.
