

# Australian Blade Repair Technicians IRATA L1/L2/L3

Swire Renewable Energy is looking for skilled Blade Repair Technicians (IRATA L3, L2, and L1) to join us for an onshore blade repair project in Queensland, Australia. We're seeking experienced rope access professionals to perform serration application repairs up tower on wind turbine blades. Requirements for these opportunities include:

- Eligibility to work in Australia
- Valid GWO BST certifications
- Blade Repair Training
- White Card (Working in Construction)
- Valid Driver's Licence

If you're available to work from 4th August to 31st December and meet the above requirements, apply now for the following roles:

- IRATA L3 Team Leaders (ideally with serration repair experience and blade repair training):
- IRATA L2/L1 Blade Repair Technicians:

As a global provider of inspection, repair, and maintenance services to the renewable energy sector, Swire Renewable Energy is committed to delivering high-quality support across the supply chain. Our technicians are at the heart of our operations, and we foster an inclusive safety culture that prioritises the health, wellbeing, and security of our employees, customers, and partners.

## **Interested?**

If you're available to meet the specified requirements and seek an opportunity to contribute your expertise to a forward-thinking company, learn more about this opportunity and apply now via the "Apply"-button!

Please note that we do not accept applications via e-mail.

We process applications on an ongoing basis and will close the process once we have found the right candidate.

## **About Swire Renewable Energy**

Swire Renewable Energy (SRE) is a global service provider specialised in the installation, inspection, maintenance, and repair of renewable energy infrastructure, particularly focusing on wind and solar PV farms. Headquartered in Aarhus, Denmark, SRE has a strong international presence with regional offices strategically located in Australia, Denmark, South Africa, Sweden, Taiwan, and the UK.

Our core services encompass comprehensive project management, engineering expertise, and efficient asset management solutions, catering to clients throughout the entire lifecycle of renewable energy assets, including construction, operational, and decommissioning phases. Our commitment to delivering tailored and innovative services ensures that customers optimise the efficiency and longevity of their renewable energy investments and maximise the production from their assets.

At the heart of Swire Renewable Energy is a dedicated team of over 500 highly skilled technicians, each possessing specialised knowledge in areas such as high voltage systems, mechanical engineering, blade maintenance, and construction. With a high focus on Health and Safety, these specialists are instrumental in providing bespoke solutions aimed at maximising the performance and sustainability of our customers' green energy assets.
